## **Spring Clamp Terminal Block Conversion Adapter**

Model: FA1-TE40PA **New Product Release** No. 20-06E Quick and easy wiring, offering innovative solution **Less maintenance Easy wiring Stable connection** Spring clamp terminal block can be used to reduce wiring time Easy push-in connection Front connection enabled for connector type modules to reduce installation space Applicable series MELSEC iQ-R Goods MELSEG series IT system Edge computing MELSEG L series

Front connection type now available in addition to the existing relay terminal block, which is used together with a digital signal converter

#### Features of spring clamp terminal specification

### **Easy wiring**

Wiring time can be significantly reduced by push-in connection.

\* Calculated by comparing the time taken by non-experts with two years of experience (Data sourced from Japan Switchboard & control system Industries Association)

### **Stable connection**

Screws are vibration resistant. Uniform quality is guaranteed for wiring since no special skills are required.

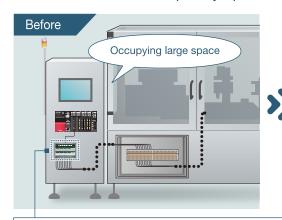

### **Less maintenance**

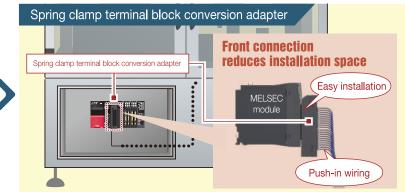

Screw tightening during maintenance is not required, reducing work load of workers. Rewiring work is also facilitated by push-in connection.

## Easy push-in connection available in limited space

Front connection does not require any separate terminal block, enabling installation in a small cabinet or inside a system.

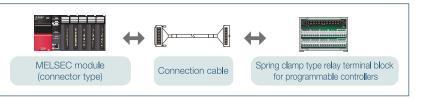

# Alternative for users who have no space problem

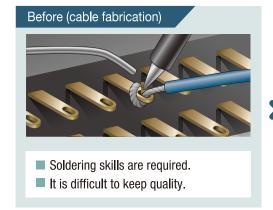

Use our spring clamp type relay terminal block for programmable controllers.

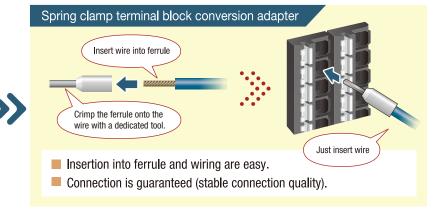

(For details, refer to the product list on the back cover page.)

## Quick and easy wiring and reliable quality

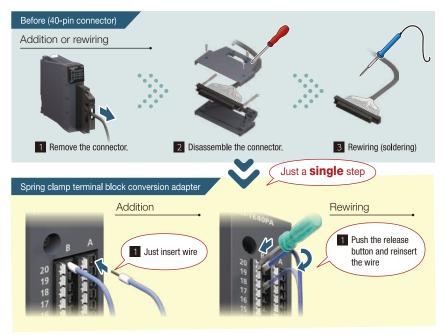

Uniform connection quality is guaranteed since no soldering skills are required.

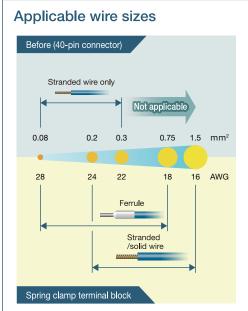

# Easy to add signals with various wire sizes supported

Signal wires can be rewired easily for extension or repair of systems. The spring clamp type supports large wire sizes.

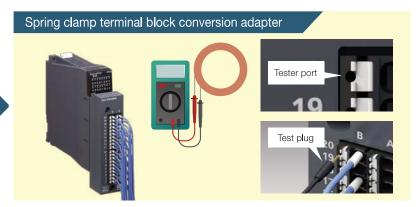

## Streamline startup and maintenance

A tester port is provided for continuity check, enabling reduction in time required for startup and maintenance. (The test plug is the reference product.)

#### ■ Reference product

Item	Specification		
Name	Test plug		
Model	MPS-MT 1-S		
Manufacturer	PHOENIX CONTACT GmbH & Co. KG		
Shape	7		
Test pin	Dia. 1.0 mm		
Socket*	Dia. 2.0 mm		
Cable length	150 mm		

<sup>\*</sup> Socket to insert the test lead of the tester

#### **■** Product line

Name	Model	Remarks
Spring clamp terminal block	FA1-TE40PA	Adapter, mounting bracket,
conversion adapter	I A I - I L 4 O F A	mounting screws

#### ■ Product list

Name	Model	Remarks
Spring clamp type relay terminal	FA1-TE1S32XY	32 points, horizontal type
block for programmable controllers	FA1-TESV32XY	32 points, vertical type
Connection cable*	FA-CBL05FMV	For sink/source interface
	FA-CBL05FMVE	For negative common input

<sup>\*</sup> These are a few examples of connection cables. Various cables such as ones with different lengths, sink/source type cables, and branch cables are also available. Cable models depend on the applicable programmable controllers or cable lengths. For details, check our website or selection tool.

#### MITSUBISHI ELECTRIC ENGINEERING COMPANY LIMITED

NAGOYA ENGINEERING OFFICE | 1-9, Daiko-Minami, 1-Chome, Higashi-ku, Nagoya, Aichi 461-0047 Japan

#### Precautions for Choosing the Products

Mitsubishi Electric Engineering will not be held liable for damage caused by factors found not to be the cause of Mitsubishi Electric Engineering; opportunity losses or lost profits caused by faults in the Mitsubishi Electric Engineering products; damage, secondary damage, accident compensation caused by special factors unpredictable by Mitsubishi Electric Engineering; damages to products other than Mitsubishi Electric Engineering products; and to other duties.

#### For safe use

- To use the products given in this publication properly, always read the relevant manuals before beginning operation.
- The products have been manufactured as general-purpose parts for general industries, and are not designed or manufactured to be incorporated in a device or system used in purposes related to human life.
- Before using the products for special purposes such as nuclear power, electric power, aerospace, medicine or
- passenger-carrying vehicles, consult with Mitsubishi Electric Engineering.

  The products have been manufactured under strict quality control. However, when installing the products where major accidents or losses could occur if the products fail, install appropriate backup or fail-safe functions in the system.
