

MELSEC-A/QnA series → MELSEC-Q series

Model list

Conversion adapters

For the specifications of conversion adapters and modules before and after replacement, refer to user's manuals. (User's manuals can be downloaded from our website.) Also, check that the modules satisfy the specifications of the devices currently connected.

For input/output modules

AY81EP							

*2: Mitsubishi Electric defines the QY81P as a module to replace the AY81/AY81EP. However, when replacing the AY81/AY81EP with two QY80s due to the difference in rated load current, this conversion adapter can be used.

Modules that can use the existing wiring as it is even after replacement (Conversion adapter not required)

Replacement using a universal conversion adapter ▶ P.304

Input/output modules in the table below do not support the use of a conversion adapter. However, these modules can be replaced using a universal conversion adapter even though rewiring is required.

Input/Output	MELSEC-A series module before replacement			MELSEC-Q series module after replacement				Universal conversion adapter

When there is no applicable module to be replaced ▶ Upgrading existing programmable controller systems using the time and wire saving devices ▶ P.80

Refer to the later section. The section describes how to replace modules that have no applicable module in the programmable controller series after replacement or modules that do not support the use of a conversion adapter.

(Example) The existing module uses 200VAC. But, the model list for the programmable controller series after replacement does not have a module that uses 200VAC. In such a case, the module can be replaced by using our digital signal converter (terminal module) (200VAC input type).

For analog modules

1-slot type (Applicable to MELSEC-Q series large type base units as well)

Input/ Output	MELSEC-A series module before replacement	MELSEC-Q series module after replacement	Model	Conversion adapter		No. of channels
				Shape		
			MELSEC-A series	MELSEC-Q series		
Input	A68AD (Voltage input)	Q68ADV	ERNT-AQT68AD	Terminal block (38 points)	Terminal block (18 points)	8
	A68AD (Current input)	Q68ADI				
	A68AD-S2 (Voltage input)	Q68ADV				
	A68AD-S2 (Current input)	Q68ADI				
	A68ADN (Voltage input)	Q68ADV	ERNT-AQT68ADN			
Output	A62DA	Q62DAN	ERNT-AQT62DA	Terminal block (20 points)	Terminal block (18 points)	2
	A62DA-S1					
	A68DAV	Q68DAVN	ERNT-AQT68DA	Terminal block (38 points)		8
	A68DAI	Q68DAIN				
	A68DAI-S1					

2-slot type (Not applicable to MELSEC-Q series large type base units)

Input/ Output	MELSEC-A series module before replacement	MELSEC-Q series module after replacement	Note	Model	Conversion adapter		No. of channels	
					Shape			
				MELSEC-A series	MELSEC-Q series			
Input	A68AD (voltage/current mixed input)	Q64AD-GH	× 2	*3	ERNT-AQT68AD-GH	Terminal block (38 points)	Terminal block (18 points) × 2	8
	A68AD-S2 (voltage/current mixed input)							
	A68ADN (voltage/current mixed input)							
	A616AD (Voltage input)	Q68ADV	× 2	*4	ERNT-AQT616AD			
A616AD (Current input)	Q68ADI	× 2						
Output	A616DAV	Q68DAVN	× 2	-	ERNT-AQT616DA			16
	A616DAI	Q68DAIN	× 2					

*3: When the A68AD, A68AD-S2, and A68ADN uses both voltage and current inputs, replace the module with two Q64AD-GHs, which can switch the input type (voltage or current) for each channel.

*4: When the A68ADN uses either voltage input or current input for each 8-channel group, the module can be replaced with a combination of two different modules, the Q68ADV and the Q68ADI.

For high-speed counter modules

1-slot type (Applicable to MELSEC-Q series large type base units as well)

Input/ Output	MELSEC-A series module before replacement	MELSEC-Q series module after replacement	Model	Conversion adapter		No. of channels
				Shape		
			MELSEC-A series	MELSEC-Q series		
Input	AD61	QD62-H01	ERNT-AQTD61	Terminal block (38 points)	Connector (40P)	2
	AD61-S1	QD62-H02				

Note) Intelligent function modules other than the above (such as positioning modules, information system modules, and distribution modules) do not support the use of a conversion adapter. Therefore, rewiring is required.
